119TH ASA ANNUAL MEETING

## Intersectional Solidarities: Building Communities of Hope, Justice, and Joy

AUGUST 9-13, 2024  
MONTRÉAL, QUÉBEC

### Early Bird Registration (register before July 12 at 11:59 p.m. Eastern)

*\*Membership must be current through 8/14/2024 to receive the reduced member rate. If your membership expires before 8/14/2024, you must **renew/join** to receive the member rate. Your registration category will match your membership category. For example, only those with a Retired Sociologist membership can select Retired Sociologist registration.*

\$262 – Regular Member/Affiliate Member

\$140 – Student/International Associate/Community College Faculty/Part-time Contingent Faculty/Not Employed Sociologist/  
Retired Sociologist/High School Teacher

### Regular Registration (July 13 – August 13)

*\*Membership must be current through 8/14/2024 to receive the reduced member rate. If your membership expires before 8/14/2024, you must **renew/join** to receive the member rate. # ASA 2023 CITAMS Sessions

## Our amazing CITAMS Sessions!

### MONDAY, AUGUST 12th

#### ASA Sections and Communities Open House

8:00 to 9:30am, Palais des Congrès de Montréal, Floor: Level 5, 517A

Table 4: Section on Communication, Information Technologies, and Media Sociology

### TUESDAY, AUGUST 13th

#### Media, Technology, and Emotion

8:00 to 9:30am, Palais des Congrès de Montréal, Floor: Level 5, 519B

Presider: Timothy Recuber, Smith College

- Black Men, Film, and Affective Reflections
  - Anthony Jerome Stone, University of Memphis
- Data Auxiliaries: Making Online Dating ‘Work’ with Dating Spreadsheets
  - Skyler Wang, University of California, Berkeley
- Emotional Tipping Points: Digital Photography and Video as Moral Shocks in Online Social Movements
  - Jeff T. Sheng, University of Michigan-Ann Arbor
- Political Claimsmaking and Emotional Expression
  - Deana Rohlinger, Florida State University; Christian Alexander Vaccaro, Indiana University of Pennsylvania; Brian McKernan, Pace University
- When the Baby Never Comes: Perinatal Loss and Claiming the (Cyber)Space for Grieving
  - Ayrliia Welch, SUNY - Buffalo; Mari Plikuhn, University of Evansville; Elizabeth Long

# ASA 2023 CITAMS Sessions

---

## **The Sociology of Artificial Intelligence**

10:00 to 11:30am, Palais des Congrès de Montréal, Floor: Level 5, 519B

Presider: Taylor M. Cruz, California State University-Fullerton

- Attitudes Towards AI Text and Image Generation in Media Fandom Communities
  - *Irissa Cisternino, Stony Brook University*
- Goddess in the Machine: Constructing What Counts as Women in Livestreaming
  - *Jun Zhou, University of Michigan Ann Arbor*
- Opening the Black Box: Explaining Automated Software Systems
  - *Alka Menon, Yale University; Zabba A. Abba Omar, Yale University*
- The Rise of Open Science and Corporate Power in Artificial Intelligence Research
  - *Zhuofan Li, University of Arizona*
- Twitter Dreams of AI: Understanding AI Futurity Through Sentence Embeddings
  - *Stephanie Zhang, UCLA*

## **Communication, Information Technologies, and Media Sociology Roundtables**

12:00 to 1:00pm, Palais des Congrès de Montréal, Floor: Level 5, 517A

- Table 01: COVID-19
- Table 02: Gaming
- Table 03: Sex and Gender
- Table 04: Artificial Intelligence
- Table 05: Political Communication
- Table 06: Social Inequality
- Table 07: Online Safety & Community
- Table 08: Media Studies
- Table 09: News Media
- Table 10: Social Movements
- Table 11: Theory & Methods

## **Communication, Information Technologies, and Media Sociology Business Meeting**

1:00 to 1:30pm, Palais des Congrès de Montréal, Floor: Level 5, 517A

# ASA 2023 CITAMS Sessions

## **Communication, Information Technologies, and Media Sociology Open Panel**

2:00 to 3:30pm, Palais des Congrès de Montréal, Floor: Level 5, 511E

Presider: Celeste Campos-Castillo, Michigan State University

- Closure Mechanisms for the Creation of Audience Overlap in Triads of Social and Communication Platforms
  - Yu Xu, Northwestern University
- Data Practices of Singapore's Smart City
  - Josephine Seah
- More than Money and Metrics: Exploring the Journey of Atheist Influencers
  - Esther Chan, University of Wisconsin-Milwaukee; Di Di, Santa Clara University
- Public Attitudes toward State and Corporate Privacy Invasions
  - Long Doan, University of Maryland-College Park; Brian T. Connor, University of Maryland-College Park
- Transparency and Trust: Race, Gender, and Surveillance in Romantic Relationships
  - Anna Gjika, SUNY-New Paltz; Fanny Ramirez

## **CITAMS-related sessions of interest!**

### **SATURDAY, AUGUST 10th**

#### **21022- Technology, Innovation, Uncertainty, and Change in Organizations**

4:00 to 5:30pm, Palais des Congrès de Montréal, Floor: Level 5, 513F

#### **21039 - Pandemic and AI Impacts on Teaching**

4:00 to 5:30pm, Palais des Congrès de Montréal, Floor: Level 5, 519A

### **SUNDAY, AUGUST 11th**

#### **30408 - Politics of Artificial Intelligence**

10:00 to 11:30am, Palais des Congrès de Montréal, Floor: Level 5, 511D

#### **30627 - The Joy of AI for Teaching and Learning in Sociology**

12:00 to 1:30pm, Palais des Congrès de Montréal, Floor: Level 5, 515B

#### **30822 - Social Media and the Internet II**

2:00 to 3:30pm, Palais des Congrès de Montréal, Floor: Level 5, 513F

# ASA 2023 CITAMS Sessions

---

## MONDAY, AUGUST 12th

### **40221 - Media and Society**

8:00 to 9:30am, Palais des Congrès de Montréal, Floor: Level 5, 513E

### **40223 - Media, Memory, and Everyday Life: Cultural Narratives and Social Practice**

8:00 to 9:30am, Palais des Congrès de Montréal, Floor: Level 5, 514A

### **40420 - Sex, Sexualities, and Technologies**

10:00 to 11:30am, Palais des Congrès de Montréal, Floor: Level 5, 513D

### **40436 - Section on Science, Knowledge, and Technology Roundtables**

10:00 to 11:00am, Palais des Congrès de Montréal, Floor: Level 5, 517C

- Table 4: Exploring digital spaces and technologies

### **40857 - Open Refereed Roundtables**

2:00 to 3:30pm, Palais des Congrès de Montréal, Floor: Level 7, 710A

- Table 18: Culture & Media
- Table 22: Media & Online Community

## TUESDAY, AUGUST 13th

### **50232 - The 2024 Presidential Election and the Politics of Media**

8:00 to 9:30am, Palais des Congrès de Montréal, Floor: Level 5, 516D

### **50404 - Gendered Glitches: Race, Class, Gender, and Technology**

10:00 to 11:30am, Palais des Congrès de Montréal, Floor: Level 5, 510C

### **50630 - Surveillance and Technology**

12:00 to 1:30pm, Palais des Congrès de Montréal, Floor: Level 5, 516B

### **50657 - Section on Sociology of Culture Roundtables**

12:00 to 1:30pm, Palais des Congrès de Montréal, Floor: Level 7, 710A

## ARTICLE PUBLICATIONS

### **"Identity Theft, Trust Breaches, and the Production of Economic Insecurity" in the American Sociological Review.**

By Jordan Brensinger.

Across various domains of social life, organizational reliance on personal data and exposure to unanticipated financial hardship have transformed Americans' life chances and access to opportunities. This article examines an area where they intersect: the hardship caused by breakdowns in information systems. I focus on the case of identity theft, showing how that event—experienced by tens of millions of Americans annually—contributes to economic insecurity. To do so, I first develop a theory of insecurity that links feelings of precariousness to breaches of trust at three levels: interpersonal, organizational, and systemic. Drawing on an original qualitative study of identity theft resolution, I find that most victims worried about their financial lives because they could no longer count on certain people, organizations, or systems. Beneath this commonality, race and class informed feelings of insecurity and associated coping strategies following identity theft. Low-income people and people of color tended to direct suspicion at personal networks and report ending relationships and informal assistance. In contrast, middle- and upper-income and White individuals disproportionately blamed organizations and demanded their protection. These findings—along with the trust-based theory that helped make them visible—have important implications for the study of insecurity, inequality, and trust in the information age.

### **"The Culture of Censorship: State Intervention and Complicit Creativity in Global Film Production." in the American Sociological Review.**

By Jun Fang.

How does state censorship shape global creative production? To explore the merger of art and the state in a global context, I adopt a micro-sociological approach to examine the culture of censorship and reconceptualize censorship as an ongoing, social process. Based on participant observation within a global film studio and interviews with industry insiders in Beijing and Los Angeles, I investigate how global cultural producers navigate China's rigid film censorship system. My analysis reveals how China's state censors use multistage gatekeeping and intermediated censorship to infiltrate the creative process and exert global influence. I then show how informality transforms these organizational procedures into a relational process that is hard to trace. In this, studio executives and filmmakers are induced to engage in complicit creativity, seeking creative negotiations through working with, rather than against, the state; specifically, they practice

concession, reconfiguration, and collusion. These processes anchor a culture of censorship characterized by the symbiotic relationship between censors and creators, epitomizing a dynamic dance between everyday state power and everyday resistance. This relational model of censorship provides useful analytic scaffolding, extending our knowledge of the inner workings and consequences of state intervention in the new global cultural economy.

.....

**"How Segregation Ruins Inference: A Sociological Simulation of the Inequality Equilibrium." in Social Forces.**

By Jonathan Mijs and Adaner Usmani.

Why do many people underestimate economic and racial inequality and maintain that theirs is a meritocratic society? Existing work suggests that people are rationalizing, misinformed, or misled. This article proposes an additional explanation: Inequality itself makes economic and racial disparities difficult to understand. In unequal societies, individuals establish their networks at formative institutions patterned by class and race. As a result, they unwittingly condition on key causal pathways when making descriptive and causal inferences about inequality. We use a simple agent-based model to show that, under circumstances typical to highly stratified societies, individuals will underestimate the extent of economic and racial inequality, downplay the importance of inherited advantages, and overestimate the relative importance of individual ability. Moreover, we show that they will both underestimate the extent of racial discrimination and overestimate its relative importance. Because segregated social worlds bias inference in these ways, all individuals (rich and poor) have principled reasons to favor less redistribution than they would if their social worlds were more integrated.

**BOOK PUBLICATIONS**

**Agenda for Social Justice: Solutions for 2024**

By Kristen M. Budd, Heather Dillaway, David C. Lane, Glenn W. Muschert, Manjusha Nair and Jason A. Smith

The Agenda for Social Justice: Solutions for 2024 provides accessible insights into some of the most pressing social problems and proposes public policy responses to those problems. The book will be of interest to scholars, practitioners, advocates and students interested in public sociology, the study of social problems and the pursuit of social justice.

## JOURNAL SPECIAL ISSUES

### **Special Issue for the Journal of Environmental Media**

**"Actualize" and "Fantasize" Sections of the Journal Special Issue on "Care-ful convening: towards low carbon and inclusive knowledge sharing"**

Edited by Juliet Pinto and Patrick Brodie

This special issue will illustrate how numerous scholars have employed media theories and techniques to adjust decarbonization amidst precarity, leading to new forms of gathering to support one another and imaginatively blend head and heart, theory and practice, academia and activism. Its lessons must be brought to light alongside other sectors that may face similar challenges. In a context where competition for positions and financial resources is intense and facing sociotechnical change, such as the use of algorithms in journalism (Christin 2020), how can we imagine, test and make possible, convivial, lowtech, low-carbon, exploratory and equitable projects?

[https://www.intellectbooks.com/asset/79161/1/JEM\\_6\\_2\\_CFP.pdf](https://www.intellectbooks.com/asset/79161/1/JEM_6_2_CFP.pdf)

Manuscript by May 15, 2024

### **Special issue of New Media & Society**

**A Brave New Democracy: The impact of social media, algorithms and AI on politics & citizenship**

Edited by Karolina Koc-Michalska, Darren Lilleker, Bente Kalsnes, Homero Gil de Zuniga, and Thierry Vedel

This special issue aims to understand the role of new communication processes, the development of multiple platforms and the role of AI in reshaping political and social interactions, and how they are related to citizens, and their role as active actors in democratic or non-democratic societies. It aims to explore the roles of networked active publics within and across nations and the extent that their deliberative and communicative activities contribute positively or negatively to civic and democratic culture, pluralism and societal cohesion. It also aims to understand how organizations facilitate and employ AI, algorithmic based social media information, and other technological developments in building citizenry or on the contrary how they limit the role of individual citizens. Topics may include the construction of new norms and understandings of citizenship across the political spectrum, the replacement of civic groups with networked-based communication, and the proliferation of identity-based language codes. These features of changing citizen-communication ecologies may be involved in building a sense of community, altruism and belonging, but they may also facilitate polarization, antagonism, isolation, and disruption (Koc-Michalska et al., 2023).

Abstract by Jun 1, 2024

**Special issue of Surveillance & Society**

**Dialogue Section: The promises and perils of synthetic data and surveillance**

Edited by Bryce Newell

We invite expressions of interest to write short (~2000-word) position papers for an upcoming Dialogue section of Surveillance & Society focused on the promises and perils of synthetic data. The Dialogue will address the surveillance implications raised by the development of synthetic data through machine learning processes, including those which serve as training data for artificial intelligence (AI) and generative AI applications. We aim to publish the section in the December 2024 issue of Surveillance & Society.

Abstract by Jun 1, 2024

**Special issue of Digital Journalism**

**Reimagining visual journalism theory and practice in the digital age**

Edited by T. J. Thomson, Ryan J. Thomas, Iulila Alieva, and Shangyuan Wu

This special issue examines the intersection of visual communication, emerging technology, and digital journalism, and has two primary aims. First, it seeks to explore how visual research methods and visualization approaches can be used to help map the present and future of visual journalism studies. Second, it seeks to critically interrogate and empirically assess how emergent technology is reinforcing, disrupting, or transforming the theory and practice of visual journalism. In doing so, the issue deepens our understanding of digital visual journalism studies as a field, while also providing urgently needed insight into how longstanding models, frameworks, and theories can be adapted or recast to account for the realities, challenges, and opportunities afforded by emerging visual technologies in journalism.

Abstract by June 1, 2024

**Special issue of Current Sociology**

**Guiding distinctions of social theory. Analogue guidelines or digital transformers?**

Edited by Steffen Roth, Steve Watson, Harry F. Dahms, and Arthur Atanesyan

ICT and the increasing availability of digital data are dramatically changing the processes of research and knowledge production in sociology. While the pace, scale, and scope of methodological innovation in digital sociology and the computational social sciences are impressive, theory development is much less dynamic in these fields (Roth 2019; Roth et al., 2019) not least due to resistance against the digital transformation, including the digital transformation of social theory, particularly among critical sociologists (Ossewaarde 2019). This mismatch is problematic as digital methods do not only provide ever-larger datasets for the testing of established theories, but also allow and even call for new forms of digital theorising (Kitchin 2014). Novel and innovative forms of theorising would imply the translation of analogue content into digital, binary distinctions such as 1/0.

<https://derroth.com/2023/12/01/cfa-special-issue-guiding-distinctions-of-social-theory-analogue-guidelines-or-digital-transformers/>

Abstract by June 15, 2024

**Special issue of British Journal of Industrial Relations**

**Technological Change, Power and Work**

Edited by Peter Turnbull

We invite contributions that explore both the theoretical and empirical aspects of different and emerging technologies that are currently transforming workplaces, including both traditional technological tools like automation and new ones like digitalization, robotization and AI, with particular attention to the technologies affecting frontline workers. Our main focus is on understanding how these technologies are socially integrated within particular sectors and workplaces. We need to consider the power dynamics that drive how work is reorganized and assess their effects on labour, such as work intensification, industrial democracy, and workers' autonomy and discretion in the workplace. Power is a central interest, and we welcome articles that explore the power of employers, forms of individual and collective resistance and influence by workers and trade unions to negotiate technological change, and interventions by states at both national and supra-national levels. We welcome articles that explore the opportunities and resources available for organised labour to mobilise in countering some of the more deleterious effects of technological change.

Long Abstract by July 31, 2024

**Special Issue of the Journal of Organizational Ethnography**

**Beyond traditional fieldwork: Digital ethnography's role in understanding modern work(places)**

Edited by Marko Orel and Heidi Dahles

This special issue explores the evolving role of ethnography in organization and management studies, focusing particularly on its application in workplace research. Originating from anthropology and gaining prominence through the Malinowskian paradigm of the 1930s, ethnography combines fieldwork with ethnographic writing (Clifford, 1986; Hirsch & Gellner, 2001). It has evolved to address the complexities of modern organizational environments, including digital and hybrid workplaces (Luff & Heath, 2019; Ritter, 2021). Initially used by psychologists and sociologists in the early 20th century, organizational ethnography now delves into work-life experiences, workplace cultures, and power dynamics (Zickar & Carter, 2010; Brannan et al., 2007). The digital era, marked by global pandemics and technological advancements, has catalyzed the rise of digital ethnography or 'netnography' (Dominguez et al., 2007; Murthy, 2008; Góral ska, 2020). This method has been instrumental in understanding remote work dynamics, gender relations, and mental health challenges in the context of the COVID-19 pandemic (Manzo et al., 2020; Gera & Hasdell, 2021; Watson & Lupton, 2022). That being said, this issue aims to expand discussions on the utility and challenges of digital ethnography in workplace studies. It will cover a range of topics, including the contribution of ethnography to organizational studies, the impact of digital methods on workplace research, issues in ethnographic writing, and the role of ethnography in corporate strategy and intervention. Finally, it will explore new fields and forms in workplace ethnography, such as the use of immersive technologies (i.e., XR), and critique digital approaches in this context.
